TECH SKILLS

- **LANGUAGE:** Java
- **FRONTEND:** Reactjs
- **BACKEND:** Nodejs
- **DATABASE:** MongoDB

EDUCATION

B.Tech Information Technology
Kongu Engineering College

CGPA: 8.54
2023 - 2027

Higher Secondary
AVP National Matric Hr.Sec.School
Percentage: 93.83
2021-2023

AREA OF INTEREST

- Database Management System
- Object Oriented Programming

CERTIFICATIONS

- AWS CLOUD PRACTITIONER
- Infosys SpringBoard - DBMS

SOFT SKILLS

- Problem-Solving
- Adaptability
- Persistence
- Collaboration

PROFILE

Detail-oriented software developer with hands-on experience in full-stack web development, including JavaScript, Node.js, and MySQL. Committed to delivering efficient, user-centric solutions and continuous professional growth.

PROJECTS

Legal Service MarketPlace

JUNE 2024 - DEC 2024

Designed and implemented a full-stack web application connecting clients and lawyers for legal service discovery and case management, including secure authentication, profile management, scheduling features and a user-focused interface to improve workflow efficiency.

Technologies Used: PHP, MySQL, JS, PHPMailer

Smart grocery Management

JAN 2025 - MAY 2025

Built a smart grocery management system enabling individuals to track inventory, organize grocery items and optimize household consumption through stock monitoring, planning tools and structured data management.

Technologies Used: MERN Stack

E-commerce Platform

OCT 2025

Created an e-commerce platform featuring interactive 3D product visualization, responsive design and dynamic user interactions to deliver an engaging and seamless shopping experience.

Technologies Used: MERN Stack

Deployment Link: ecommerce-orangejuice.onrender.com

ACHIEVEMENTS & HACKATHONS

1st Prize – 8-hour Hackathon (Zhagaram Club, College)

Developed a Tamil-based learning platform

2nd Prize – 12-hour Hackathon at SNS College | Developed an Object Detection Model for ATM Surveillance

3rd Prize – 12-hour Hackathon at CIT | Built an AI-powered Hospital Management System
